

5th GRADE CAREER CLUSTERS

Finance

Programs in this cluster prepare students to plan and implement related services for financial and investment planning, banking insurance, and business financial management.

Government & Public Administration

Programs in this cluster prepare students to plan and execute government functions at the local, state and federal levels, including governance, national security, foreign service, planning, revenue and taxation, and regulations.

Information Technology

Programs in this cluster prepare students to build linkages in information technology occupations for entry level, technical, and professional careers related to the design, development, multimedia, and systems integration services.

Marketing

Programs in this cluster prepare students to plan, manage, and perform marketing activities to reach organizational objectives that include brand management, professional sales, merchandising, marketing communications, promotions, and market research.
